

GOVERNANCE

Public Financial Management - Post-Conflict Capacity Building -
Mining Policy, Law and Administration - Procurement Reform -
Customs Reform - Domestic Resource Mobilization

IBI has helped governments around the world improve performance to better serve their populations.

Transparency and accountability are the key principles that guide our work. As these principles permeate an organization, we see them generate measurable improvements in every area of performance.

IBI implemented the **Liberia Governance and Economic Management Assistance Program (GEMAP)** supporting 11 government institutions with Embedded Senior Advisors, dynamic organizational assessments, operational streamlining through IT-based solutions, and capacity building with on-the-job training.

Ethiopia: IBI developed a bilingual **Procurement Manual** and led the corresponding **training module** for government officials and vendors.

Gabon: IBI utilized **geo-spatial analysis** to identify and map potential **growth corridors** for the mining industry.

Benin: IBI assessed **port and customs systems** and management procedures to develop a **strategic plan** for performance improvement.

IBI is proud to be USAID's 2015 Small Business of the Year!
