In Liberia, IBI implemented the Governance and Economic Management Support Program from 2011 to 2016. This $50 million program strengthened public sector capacity. As a result:

11 government agencies now use financial accounting software to produce their financial reports.

14 government agencies have created PFM manuals to guide their day-to-day financial operations.

Over 850 government employees have been paid by the project’s mobile money programs.

In Bangladesh, IBI is implementing the Bangladesh Trade Facilitation Activity from 2013 to 2018. This PFM project seeks to increase efficiency and transparency in cross border trade. Some efforts include:

Rebuilding the government’s customs website, so accurate information is always available.

Enhancing supply chain security, to ensure safe and efficient logistics.

Implementing an authorized economic operator program to encourage strong partnerships.

IBI holds USAID’s Public Financial Management IDIQ Contract for 2012-2017. Find out more about our approach by scanning this code:
